

The figure displays a 12x12 grid of values representing a 2D Gaussian function. The x and y axes are labeled from 0 to 12. A color bar on the right indicates the function values, ranging from 0.00 (blue) to 2.00 (red). The grid is divided into three regions: a red border, a green border, and a white interior. The function is centered at (6, 6) with a maximum value of 2.00.
